

# AGES2022

ANNUAL GEOSCIENCE EXPLORATION SEMINAR  
5–6 April 2022, Alice Springs, Northern Territory

## AGES 2022 WORKSHOPS

### CSIRO Workshop - Introduction to the NDI Carrara 1 Hylogger Dataset Monday 4 April | 2:30pm – 5:00pm

This CSIRO run workshop will provide an introduction to using Hylogger hyperspectral mineralogy outputs for informing geological logging, alteration mapping, and sampling using the NDI Carrara 1 dataset(s) as a case study. It will include a brief introduction to hyperspectral mineralogy and The Spectral Geologist (TSG) software, but the focus will be on providing the tools for visualizing and investigating the Carrara 1 HyLogger data in TSG in the context of other imported geoscience datasets including geochemistry (Minalyze CS data), and also exporting the outputs for use in other software packages.

This workshop is recommended for anyone interested in working with Hylogger data, and in particular the NDI drill hole datasets. No previous hyperspectral mineralogy experience is required.

For further information on this workshop please contact Tania Dhu on 08 8999 5214 or [tania.dhu@nt.gov.au](mailto:tania.dhu@nt.gov.au)

### Mines Branch Workshop: Monday 4 April | 3pm -5pm, Ellery Room Alice Springs Convention Centre

The Department of Industry, Tourism and Trade Mines Branch promotes and facilitates the growth of the mining industry. The mines branch regulates mineral development activities from the first grant of tenure, to the approval and regulations of operations, through site rehabilitation to closure.

This facilitated workshop will provide an opportunity for industry stakeholders and key representatives from the Mines Branch to discuss the following;

- Update on environmental reforms (EP Act and MMA)
- Update on mining management plans requirements (review of mine MMPs requirements and feedback on Exploration MMPs)
- Guide to mineral exploration in the NT
- Update on amendments to the MTA
- De-registered companies and the impact on holding a mineral title

For further information on the Mines Branch Workshop please contact Andrew Hurwood on 08 89995368 or [andrew.hurwood@nt.gov.au](mailto:andrew.hurwood@nt.gov.au)
