

- Exploration for uranium is making a strong recovery in 2023–24.
- Past production > 146 000 t U₃O₈.
- Ranger uranium mine ceased production in January 2021 after 40 years of operation.
- World class unconformity-style uranium field in Alligator Rivers region of Pine Creek Orogen.
- Large sandstone-hosted deposits in central Australia.
- Numerous opportunities for new discoveries.
